SOVEREIGN BUSINESS PLAN

TITAN GAMES SECURITY L.L.C. & NICHOLAS YOUNG MASTER TRUST

Fiduciary: Nicholas Young Master Trust
EIN: 41-6820289 | Michigan MCL § 700.7913
COTS Vendor: Titan Games Security L.L.C.
CAGE: 25AD9 | UEI: 53SXM538MG79

1. Executive Summary & Operational Posture

Titan Games Security L.L.C. operates as a 100% sovereign, non-dilutive commercial vendor under the Nicholas Young Master Trust. Built over a 10-month continuous engineering sprint from a zero-capital baseline, the enterprise provides bare-metal C applications, physical sensory root-of-trust hardware nodes, and defense-compliant COTS integrations without relinquishing equity, control, or intellectual property.

TENURE & CREDIT STANDING
Grade A (9-Yr)
Experian Commercial Bureau Tenure

DEFENSE AUDIT SCORE
110 / 110
NIST SP 800-171 Rev 2 | SPRS: 313

PATENT PRIORITY STATUS
USPTO 64/014,873
DYV-PHYS-HASH Engine Filing

FEDERAL VENDOR IDENTIFIERS
25AD9 / 53SXM
Active CAGE Code & SAM.gov UEI

2. Historical Founder Contributions & Baseline Infrastructure

Contribution Asset	Operational Description	Capital / Labor Value	Ownership Allocation
STSE PRO v3.69 / AURA Core	Sub-40ns C bare-metal bitwise execution binary	Self-Funded Labor	100% Master Trust
Aura Arta Alta Ara Node	Carved oak sensory slab with embedded electronics	Physical Craftsmanship	100% Master Trust
Off-Grid Power Generator	Low-RPM kinetic trike power generation unit	Hardware Testbed	100% Master Trust
Federal Registration Suite	SAM.gov UEI, CAGE, SBA, and SPRS audit records	Administrative Direct	100% Titan Games LLC
USPTO Intellectual Property	Pro se filing app 64/014,873 under Micro Entity	Sovereign Patent Docket	100% Master Trust

Capital Strategy & Governance Model: Titan Games Security L.L.C. rejects dilutive equity financing. Corporate growth is funded strictly through commercial software binary licensing, COTS hardware sales, and federal defense contract execution, ensuring complete alignment with the Nicholas Young Master Trust fiduciary charter.

3. Staged & Regulated Expansion Timeline

The enterprise enforces a structured five-stage rollout plan to expand commercial operations, scale federal contracting participation, and institutionalize hardware-gated security nodes across regulated markets.

Stage I: Immediate Readiness & Bureau Activation — 6-MONTH HORIZON

Activate D&B commercial trade line reporting cycle; finalize DARPA MXO proposal submission; deploy localized COTS software licensing endpoints for municipal and commercial defense buyers.

Stage II: Federal Contracting Execution & CMMC Validation — 1-YEAR HORIZON

Transition from SPRS Basic Assessment to formal CMMC Level 2 third-party audit; secure initial federal sole-source procurement contracts under CAGE 25AD9; expand bare-metal C API integrations.

Stage III: Hardware Node Manufacturing & Regional Deployment — 3-YEAR HORIZON

Scale production of sensory root-of-trust hardware nodes; introduce standardized industrial enclosures for "Aura" class physical security gates; establish regional support testbeds.

Stage IV: Enterprise Infrastructure & Commercial Licensing — 5-YEAR HORIZON

Commercialize high-throughput bare-metal evaluation engines across tier-1 defense contractors; establish sovereign data-center blades incorporating hardware-level physical state verification.

Stage V: Sovereign Conglomerate Institutionalization — 10-YEAR HORIZON

Institutionalize the complete Titan Conglomerate ecosystem across legal, financial, and physical security domains; operate autonomous, off-grid energy and computational infrastructure globally.

Regulatory Compliance Dialect: All operational expansion stages maintain mandatory adherence to DFARS 252.204-7012, NIST SP 800-171, and FAR acquisition standards, guaranteeing seamless integration with federal prime contractors and military procurement offices.

4. Software-Evaluated Asset & IP Portfolio

The enterprise leverages its internal software evaluation engine (STSE PRO / AURA) to evaluate, track, and manage its intellectual property portfolio, physical hardware assets, and technical infrastructure.

5. Portfolio Asset Evaluation Matrix

Portfolio Asset Domain	Asset Component	Evaluation Basis	Asset Governance
Core C Software Engine	STSE PRO v3.69 / AURA Engine	Bare-Metal C Performance	Nicholas Young Master Trust
Physical Sensory Nodes	"Aura Arta Alta Ara" Hardware	Multi-Factor Root-of-Trust	Nicholas Young Master Trust
Off-Grid Power System	Low-RPM Kinetic Trike	Standalone Energy Testbed	Nicholas Young Master Trust
Sovereign Patent Portfolio	USPTO App 64/014,873	Priority Date Recordation	Nicholas Young Master Trust
Commercial Vendor Entity	Titan Games Security L.L.C.	Active CAGE / UEI Entity	Titan Games Security L.L.C.

6. Financial & Risk Mitigation Architecture

CAPITAL RISK
Zero Debt / Equity
100% Self-Funded Execution

IP PROTECTION
Trust Encapsulation
Shielded from Commercial Claims

REVENUE STREAM
COTS & Licensing
Binary Software & Hardware Units

MARKET FOCUS
Defense & Security
DoD, DARPA, Prime Contractors

Final Authorization: This business plan and investment portfolio manifest is ratified under the fiduciary seal of the Nicholas Young Master Trust. All operations proceed strictly under sovereign, non-dilutive commercial execution protocols.
